

Navigating our clients on the path to Compliance and Certification

INFORMATION NAVIGATORS offers Security & Compliance consulting services to organizations seeking compliance with standards such as ISO 27001, HIPAA and/or PCI, along with assistance in developing the processes and framework that allow for a future certification and conformance with industry standards.

Although the INFORMATION NAVIGATORS team of experts is available to consult on a variety of security and compliance-related issues, our main focus includes the areas of:

- ISO 27001 Certification
- HIPAA Compliance
- PCI Certification
- Development of an Information Security Management System (ISMS)
- Gap Analysis and remediation
- Risk Analysis and Risk Assessments
- Audit preparation (certification, internal or client-based)
- Creation and maintenance of internal security-related processes, such as Change Management, Asset Management and Access Control policies.

In addition to over 35 years of Information Security and Compliance experience, INFORMATION NAVIGATORS offers our clients the use of its VELASTAR technology, which not only provides the roadmap to ISO 27001, HIPAA or PCI compliance, but allows you to develop and sustain the processes necessary to maintain compliance with the standards.

All told, INFORMATION NAVIGATORS is dedicated to providing our clients with both the path to compliance and certification and also the tools and processes to obtain certification quickly and efficiently.
